PORTFOLIO POSITION

Portfolio Duration	5.6 years
Portfolio Yield (Market)	4.80%

MANAGER'S COMMENTARY:

With the US widely expecting another 2 rate hikes in 2018, we view that monetary policy in major economies is likely to remain divergent in the medium term. However, with better global growth and slightly higher inflation expectations, the yield curve may steepen slightly, i.e. yields on the longer end may start to go up, relative to last year. However, risk of trade war and overly aggressive monetary tightening may pose threat to the global economy and may even cause the yield curve to flatten, reflecting slower growth expectations in the future. We view these two different outcomes as possible and hence find that keeping duration at around 5 – 5.5 years will shield our portfolio from risk of yield curve steepening while still long enough to benefit from higher yields. Rising yields may impact the portfolio returns in the short term, but in the longer term we see opportunities to buy good quality corporate sukuk at higher yields. With better economic growth, corporates' credit standing are expected to improve and hence we prefer to enhance yield by switching from government and government guaranteed sukuk to corporate sukuk.
